Full-Stack Developer transitioning to Wealth Management & Investment Advisory

PROFILE

Technology professional with 1.5+ years of full-stack development experience, transitioning into wealth management and investment advisory. Self-taught investor since 2021 with hands-on experience in equity analysis, mutual funds, and multi-asset portfolio management. Guided 7+ individuals on their investment journeys. Brings a rare combination of analytical rigour, financial curiosity, and client-facing communication skills to help make investing accessible and data-driven.

FINANCE KNOWLEDGE & SELF-DIRECTED INVESTING

Practical Investing Experience (2021 – Present)

- Started investing with internship stipend in final year of B.Tech; grew from hobby into a structured, research driven practice.
- Spent the first year focused exclusively on direct equities - read P&L statements, balance sheets, and cash flow reports to build a personal stock portfolio using fundamental analysis.
- Expanded into multi-asset portfolio management: equity mutual funds, debt funds, gold, and silver ETFs, applying asset allocation principles to balance risk and returns.
- Independently studied value investing through books including The Warren Buffett Way, Just Keep Buying, Coffee Can Investing and additional titles on personal finance and market behavior.

Advisory & People Skills

- Guided 7+ friends and family members through their first investment steps - covering goal setting and expectations, SIP planning, fund selection, and basic risk profiling.
- Explained equity vs. debt trade-offs, SIP vs. lump-sum decisions, and tax implications in simple terms to first-time investors.
- Motivated by a conviction that sound financial advice should be accessible to everyone, not just the wealthy.

Knowledge Areas

- | | |
|---|------------------------------------|
| • Fundamental Analysis (P&L, Balance Sheet, Cash Flows) | • Equity & Debt Mutual Funds |
| • Asset Allocation & Portfolio Rebalancing | • Gold & Silver as Inflation Hedge |
| • SIP Planning & Goal-Based Investing | • Behavioural Finance Principles |

PROFESSIONAL EXPERIENCE

Meteoros Automation LLP | *Technology Evangelist* (Sept 2024 - Aug 2025 & Feb 2026 - Present)
· Bengaluru

- End-to-end ownership of 2 client-facing web applications: an educational assessment portal, a course-selling platform, and an internal HRM system - covering requirements, design, development, testing, and deployment.
- Sole point of contact for client communication; managed expectations, led release planning calls, and translated business requirements into technical specifications.
- Designed and developed full-stack architecture (frontend + backend + database) with a focus on scalability, reliability, and performance.
- Deployed and maintained all applications on Microsoft Azure using App Services, Azure SQL, and supporting cloud infrastructure.
- Authored global-standard lab guides and step-by-step instruction manuals for SaaS products used in Azure AI Foundry training programmes.
- Built and configured AI agents using Microsoft Copilot Studio; integrated Azure AI Foundry models into production workflows.

GyanGrove | *AI Engineer Intern*

June 2024 – Sept 2024 · Bengaluru

- Led end-to-end development of three AI-driven product features including fine-tuned SDXL image models and RAG-based content pipelines.
- Built production-grade Spring Boot APIs for integrating AI capabilities into the live product.

Mind Web Ventures | *Machine Learning Engineer Intern*

Feb 2024 – May 2024 · Remote

- Developed an XGBoost-based phishing URL detection model achieving 96% accuracy; deployed via FastAPI endpoints.
- Built a RAG-powered Q&A chatbot for custom document databases (PDF, CSV).

Quidich Innovation Labs | *Computer Vision Intern*

Sept 2023 – Dec 2023 · Remote

- Researched and implemented cricket ball tracking using RT-DETR and YOLOv8 for a DRS (Decision Review System) prototype.
- Applied transfer learning on 4K / 144fps cricket footage to build a functional ball-tracking pipeline.

EDUCATION

B.Tech, Computer Science & Engineering - Manipal University Jaipur

Nov 2020 – July 2024

GPA: 8.05 / 10

Common Admission Test (CAT)

Nov 2025

Percentile: 95.83

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, Node.js, React, Next.js Cloud: Microsoft Azure (App Services, AI Foundry, SQL, VMs, Copilot Studio), AWS

Frameworks: FastAPI, Spring Boot

AI/ML: Machine Learning, Deep Learning, NLP,

Computer Vision, Generative AI

Certifications: Salesforce Administrator | AWS Academy Cloud Foundations

WHY WEALTH MANAGEMENT

I want to work at the intersection of technology and finance - where data-driven analysis meets real impact on people's financial lives. My experience building client-facing products, communicating complex technical ideas simply, and independently managing a multi-asset portfolio makes me well-suited for a wealth relationship manager or investment advisory role at a fintech firm.
